

ANCQ – 2015

An International Quiz competition

Conducted by : The Royal Australian Chemical institute, Australia

Zonal centre : Lady Doak College

International Australian National Chemistry Quiz -2015 (ANCQ – 2015 is annually conducted by the Royal Australian Chemical institute, Australia. The Quiz is truly international with the participation of many prominent countries such as Australia. Papua New Guinea, Fiji, New Zealand, Malaysia, Singapore, Western Samoa Vietnam, the Philippines, Indonesia, Hong Kong, Sri Lanka, Thailand, Brunei, Vanuatu, Germany, China, Austria and India. The ANCQ is the only educational event of its kind. One of the aims of the Quiz is to popularize science in general and chemistry in particular. In order to “catch them young”, the Quiz starts from class 7th to 12th. This year it was held on Thursday 3rd September 2015. This was extremely well received in all the 17 countries attracting over 1,00,000 entries.

The quiz competition for the Madurai zone was organized by our college. A total of 481 students from 9 schools in and around Madurai participated in the Programme. The quiz was conducted in the respective schools by the school coordinators. One student from Laksmi School, received the Award for excellence performance and 5 students –(2 from Laksmi School, 1- from Jeevana School, 1 – from Kendriya Vidyalaya, 1- from TVS Hr. Sec.) School received the award for outstanding performance. We thank and appreciate the teacher who helped us in conducting the quiz for their contribution and co-operation. We thank the Co-ordinator for the Quiz, Prof. Dr. Brijesh Pare for his guidance, patience and support through out the programme.

Result Summary

Chairman's Communique

The 2015 Australian National Chemistry Quiz was extremely well received in all the 17 countries attracting over 1,00,000 entries from Levels 7-12, representing around 1500 schools.

The ANQC is the only educational event of its kind. One of the aims of the Quiz is to popularize science in general and chemistry in particular. In order to "catch them young", the Quiz starts from class 7th. We understand that at this level there is no separate chemistry module/syllabus but students do study some chemistry topics in science books. At this stage many of students are not aware of this distinction between science in general and chemistry in particular but they join this bandwagon. That's is very important. Bright students enjoy doing this Quiz but its equally liked by the students who are struggling with science. We hope that by participating in Quiz such as this they would get interested in learning chemistry.

The teachers need to take few tutorials before the Quiz in order to make students comfortable, The certificates of the Quiz awarded by RACI are extremely valuable. On the back side of the certificate complete individual performance is given with correct answers. Looking forward to have larger participation in ANQC 2016.

Best Wishes
