

## **B.Com (Computer Applications)**

The relevance of computers in business is increasing each and everyday. Computers play a vital role in managing business. B.Com (CA) was started in the year 1994 to impart advanced learning to students in the field of Commerce and Computer for professional development. The curriculum is based on the recommendations from the industrial experts, academicians and IT Professionals. Commerce subjects such as Financial Accounting, Corporate Accounting, Marketing management, Business Management, Cost Accounting, Auditing, Taxation are dealt extensively. Computer subjects like Open Source Office Package, Big Data Management, Enterprise Resource Planning, Digital Design, Data Analytics etc., relevant to the field of commerce are covered. The students are required to complete a summer training programme for 60 hours on recent trends in information technology at the end of IV Semester. Training in computer applications in the field of commerce is an extra mileage in placements. This course bridging commerce and computer applications helps the students to become more employable.
